

Risk Manager (m/f/d)

Solvd Group (solvd) is a dynamic and growing organization who's mission is to automate the end-to-end motor claims management process by integration of the best-in-class digital and AI-supported tools available in the market. We pride ourselves on delivering excellence through innovation, collaboration, and expertise. With a global presence, Solvd operates in over 45 countries and employs more than 3,700 dedicated professionals worldwide.

We are looking for an experienced Risk Manager to join our team, with flexibility to work from Munich, Germany, or remotely.

In this role, you will be supporting the development of a state of the art risk management function in the Solvd Group. Responsible globally for managing and coordinating risk management activities, especially in the area of operational and digital risks. This includes overseeing that material risks are adequately managed, leading risk identification workshops, ensuring that actions required to mitigate risks are defined and prioritized by respective risk owners, reporting to senior management on risk profile. You will lead the implementation of the NFRM framework and report to the Chief Risk Officer of Solvd.

Some of your specific responsibilities could include:

- Ensure that an effective risk management framework is in place for the area of digital operational resilience
- Lead the implementation of the NFRM framework within the Solvd Group companies, ensuring seamless alignment with other risk management processes at Solvd.
- Ramp up of appropriate set of key controls on the Solvd business processes, incl. oversight of control performance & control testing and its proper documentation.
- Oversee that risks are managed by the 1st Line of Defense in line with risk strategy
- Presentation and discussion of significant risks with top management

Risk Manager (m/f/d)

- Interact with senior management of the business (i.e. 1st line of defense) on risk management topics (including definition of risk mitigation measures)
- Qualitative and quantitative risk management, including risk identification, risk assessment, risk analysis, control assessment
- Risk governance, including implementation and maintenance of policies and standards

What You'll bring to the Role:

- Degree, preferably in Business Administration, Economics, Mathematics, or any other analytical discipline (e.g., Risk Management, Actuarial Sciences, Finance)
- 3-5 years of work experience in P&C insurance, Claims Management Provider, IT company or asset management
- Approximately 5–7 years of hands-on experience in qualitative and quantitative risk management/ risk controlling/ risk reporting
- Knowledge in relevant regulations (e.g. DORA, VAIT, EU AI Act)
- Expertise in IT Governance
- Finance and Insurance know-how (ideally P&C) as well as understanding of complexities inherent in an insurance group (consolidation processes, legal vs. management view) allowing for cross-departmental thinking and acting
- Expertise in qualitative risk management techniques, including risk identification, assessment, analysis, and control, with the ability to apply these techniques appropriately.
- Outstanding problem-solving skills with the ability to navigate complexity
- Excellent communication and presentation skills with an ability to influence stakeholders resulting in positive outcomes
- Ability to work effectively in an international and dynamic environment, demonstrating excellent intercultural skills
- Fluency in English is required
